PORTRAIT METAL FACED A-FRAME

Description

Our Metal Faced A-Frames are heavy-duty, economical pavement signs and one of the most widely used outdoor signage solutions in Australia. Built for strength and durability, they are ideal for high-traffic retail, hospitality and promotional environments.

Constructed from high-quality steel with 20mm square tubes welded for maximum strength, these A-Frames are made to handle daily use. The upgraded hinge design is reinforced for superior durability, eliminating the traditional piano hinge for a cleaner, more professional appearance.

The frame features a sleek black powder-coated finish and an integrated top handle for easy transport and positioning. Panels are supplied loose, allowing installation with double-sided tape or rivets to suit your preferred application method.

Key Features

- Heavy-duty steel construction
- Reinforced, virtually unbreakable hinge design
